VEGETATED SEDUM TILES

FOR ROOF GARDEN APPLICATIONS

Overview

Carlisle's Vegetated Sedum Tiles are the fastest and easiest way to achieve full vegetative coverage on a Roof Garden during the day of installation. These lush and vibrant tiles are the perfect way of quickly finishing your Roof Garden project.

Features & Benefits

- Instantaneous vegetative coverage
- No waiting for plants to "grow in"
- Up to 12 different varieties of sedum can be used
- All but eliminates plant maintenance
- Further simplifies Roof Garden installation

Installation

Remove the tiles from the plastic trays. Place the tiles over a minimum 2.5" of Carlisle growth media. Water the Roof Garden assembly to the point of runoff. Your Roof Garden is now fully vegetated!

Size & Coverage Rate

- 1.4 square feet per tile
- 10" Wide x 20.2" long
- 4.5 lbs/sf fully saturated
- Minimum 95% vegetative coverage
